Asset Monitoring Devices

Features and Benefits

Securely Manage and Control Assets with Ease

RFID Enabled Wiring Devices

Hubbell's RFID enabled wiring devices allows quick and easy scanning of an entire container without having to handle individual cable sets.

The unique RFID technology is incredibly powerful and accurate. As well, it is integral to the wiring device so it can't easily fall off, get damaged, or be removed.

Combined with a Hubbell recommended middleware solution, integration into inventory management systems is seamless.

Housing Design

- Industrial duty, molded-in RFID tags
- Retrofittable to existing wiring devices
- Tags are virtually hidden inside the device

Existing Devices

- Tags are over molded into strain reliefs that can easily be added to existing devices

RFID Technology

- Tag is powerful enough to read through full baskets of cable
- Works with fixed or portable reader options
- Tags cannot fall off or be easily removed

Tracking Software

- Recommended middleware package available
- Track specific attributes, i.e. color and cable length per asset
- Edit asset conditions and other attributes
- Send alerts when asset leaves inventory location

Cord Clamp Kits

- Kits will include cord clamps, screws and inserts where applicable

Series 16 RFID Enabled

- Available as complete devices or replacement bodies

Additional Information

Fixed or Portable Reader Options

- Fixed antenna can scan through full baskets of cable sets
- Handheld reader allows for individual or bulk scanning
- Pre-programmed screens allow easy data collection
 - Receive items into inventory
 - Check out items for specific jobs or rental locations
 - Check in items to ensure all assets are accounted for
 - Change status and condition of each asset
- Upload asset information to existing inventory management systems

Note: Reader hardware and software are not sold by Hubbell, but can be purchased by a third party. Please contact a Hubbell representative for more information.

RFID Tags

Hubbell utilizes an industrial grade, passive RFID tag. Passive RFID tags do not require a battery. Radio waves from the reader activate the RFID tag, thus inducing a current in the RFID's antenna. Typical read range can go up to 4 feet from a handheld, to 10 feet from a fixed antenna.
